

VALIANCE

BIG DATA ENGINEER

JOB DESCRIPTION

JOB DESCRIPTION

We are looking for enthusiastic and fast paced individuals to join our team of data geeks. We have our data hosted on both Azure and AWS warehouses. We are looking for someone who is adept in AWS warehouse technologies. Fair understanding of Azure is a plus.

As Data Engineer at our warehouse, your primary responsibilities will be:-

- Apply your strong technical experience in building reports and governance models for BI analytics that support a broad range of analytical requirements across the company
- Work closely with product teams on the marketplace to continually evolve solutions as business processes and the requirements change.
- Extract, transform, and load data from a wide variety of data sources using SQL and AWS big data technologies.
- Creation and support of real-time data pipelines built on AWS technologies including Glue, Redshift/Spectrum, Kinesis, EMR and Athena.
- Help continually improve ongoing reporting and analysis processes, automating or simplifying self-service support for customers

QUALIFICATIONS

- 1+ years of industry experience in software development, data engineering, business intelligence, data science, or related field with a track record of manipulating, processing, and extracting value from large datasets
- Demonstrated strength in data modeling, ETL development, and data warehousing
- Experience using big data technologies (Hadoop, Hive, Hbase, Spark etc.)
- Has working knowledge on Spark, Scala, Azure - ADF, Synapse Analytics, Azure Databricks, ADLS Gen1 and Gen2, Blob, SQL Database, PL/SQL.
- Knowledge of data management fundamentals and data storage principles
- Experience using business intelligence reporting tools preferred (Power BI, Tableau etc.)

LETS GROW TOGETHER!
