

VALIANCE

FULL STACK DEVELOPER

JOB DESCRIPTION

JOB DESCRIPTION

- As a Senior Java developer, you will be responsible for developing high performing, scalable & secure Java applications and micro-services for B2C and B2B products.
- Work with DevOps team to deploy applications on cloud or on-premise infrastructure.
- Understand product design docs & requirements, translate into technical documents & development roadmap.
- You are expected to communicate work status and pro-actively highlight any delays to the product release.
- You are expected to be aware of best practices in software engineering, emerging trends and technologies thus driving thought leadership in SE practice for Valiance.
- You are also expected to drive POC's (proof of concepts), lead potential client discussions thus contributing to business growth.

TECHNICAL AND PERSONAL SKILLSET

- Strong knowledge of data structures, OOPS, design patterns, multi-threading concepts.
- Write maintainable, secure, modular code & high-performance code.
- Knowledge of TDD, writing unit test cases
- Programming Languages & Frameworks: Java, Spring Boot, Shell Scripting
- Strong knowledge of No-SQL databases like Redis, MongoDB & Message queues like Kafka/Pulsar
- Working Knowledge of AWS platform & CI/CD tools like docker is preferred.
- Excellent communication skills, both written & oral.
- Ability to learn new skills quickly, adjust to the changing needs of the project.
- You are highly enthusiastic about your work
- Ability to multi-task, manage high-pressure release scenarios occasionally.

INTERVIEW PROCESS

- 1 round of introductory discussion
- Hands on technical exercise with screen sharing
- Client technical discussion
- HR evaluation.

LETS GROW TOGETHER!
