Job Description

As a Senior Engineer, you will be able to leave your mark by working on building the mobile platform, SDK's and native apps, building beautiful user experiences, product/s that will be used by over million people worldwide. We leverage cutting-edge tools and software. If you enjoy working in a highly collaborative, fast paced environment, multi-disciplinary, you will find this role highly rewarding. Your role expectations are:

- Participate in full software development lifecycle and write code that is maintainable, clear, and concise.
- Hands on experience on coding and troubleshooting
- Ability to collaborate with other internal technology teams to coordinate and deliver software systems.
- Takes personal initiative; conscientiousness and complete follow-through on areas of responsibility.
- Translating Business Requirements into system designs.
- Hands on Knowledge of applicable methodologies, tools, standards, and procedures.
- Take/initiate appropriate corrective action based on the finding with required stake holders/ vendors
- Identify the areas of improvement and take pro-active approach to address the identified areas by means of automation / process modifications / documentation / training
- Responsible to ensure the basic hygiene of NOC tools echo system.

Technical & Functional Skillset

- Participate in Design/Architecture and solutioning discussions. Have a say in what eventually gets implemented
- Implement (design, code, test and deploy) mobile app features on the platform
- Contribute to everything from low-level networking and parsing to application logic to UI implementation
- Provide feedback into product design
- Optimize mobile applications on the Android platform.
- Develop prototypes
- Hands on experience developing applications in Android App Development from Develop, Build, Test to Deploy automated.
- Should have hands on experience using the below; oMVVM architecture, oObservable patterns and oDelegate pattern
- Android SDK, Kotlin, RxJava and Java for Framework development
- Unit, UI and E2E tests for using respective Test frameworks and Mockable.
- Experience working with automation tools (Jenkins)
- Understands version control (GIT) and branching strategies
- Understands BDD / TDD/Performance/Security/Smoke testing

Personal Skills & Background

- Hands on Experience with Android SDK development and platform tools
- Should be comfortable with Kotlin and Java for Android Application development techniques and practices.
- MVVM Architecture
- Should be able to write Unit and UI Test (JUnit/XCTest/Mockito)
- Experience taking a feature from description through implementation to completion
- Minimum 4 years of hands-on application development experience
- Knowledge of software design patterns, UI concepts, techniques, frameworks and related tools
- Experience working with automation tools (Build/Deployment/test)
- Understands feature toggling
- Experience in working in an Agile Development Environment
- Understands CI and CD, writes test to ensure CI/CD processes work
- Entrepreneurial attitude that gets high-quality projects done quickly
- Effective in working with strong technical teams, with strong interpersonal and communication skills

Let's Grow Together!

About Valiance Analytics

Valiance is a global AI & Data analytics firm helping clients build cutting-edge technology solutions for digital transformation. We work with some of the marquee brands across India, the US, and APAC to build transformative solutions for Credit Risk, Fraud, Predictive Maintenance, Quality Inspection, Data lake, IoT analytics, etc. Our team comprises 100+ professionals across Machine Learning, Data Engineering & Cloud expertise.

Why work with us?

- WFH with Flexible timings
- Twice a year appraisal for high performers
- Be a part of company's ESOP pool
- Sponsorship of Cloud Certifications
- Get to work on exciting projects
- Onsite Opportunity later

Trusted by Top Brands around the Globe..
