Job Description

- As a Senior DevOps person, you will be responsible for architecting and developing scalable, secure CI/CD pipelines using various open-source tools and cloud services for deployment of data products globally.
- You are expected to lead a team of DevOps professionals, communicate work status and proactively highlight any delays to the product release.
- You are expected to be aware of best practices in DevOps, emerging trends and technologies thus driving thought leadership in DevOps practice for Valiance.
- You are also expected to drive POC's (proof of concepts), lead potential client discussions thus contributing to business growth.

Technical & Functional Skillset

- Hands-on experience in architecting & developing high performing, secure CI/CD pipelines preferably across software startups.
- Packing and deployment of applications as docker container on self-management Kubernetes cluster or AWS managed cluster.
- Automating the build, test, and release process using various CI/CD tools on the cloud infrastructure.
- Write scripts to automate the provisioning of infrastructure as a code on various cloud services.
- CI/CD tools: Jenkins, Ansible, AWS Code Deploy, AWS Code Pipeline, AWS Code Commit
- Configuration Management: Puppet, Chef
- Knowledge of shell scripting, python
- Excellent communication skills, both written & oral.
- Ability to learn new skills quickly, adjust to the changing needs of the project.
- You are highly enthusiastic about your work
- Ability to multi-task, manage high-pressure release scenarios occasionally

Interview Process

- 1 round of introductory discussion
- Hands on technical exercise with screen sharing
- Client technical discussion 4. HR evaluation.

Let's Grow Together!
