Analytics

Job Description

- Overall, 6 years plus experience with minimum 2 years' designing and architecting data pipelines for ingestion and transformation of structured & unstructured data sources.
- Deep understanding of various cloud platforms including AWS & GCP for constructing data pipelines and storage using cloud native services.
- Understanding of database and analytical technologies in the industry including NoSQL databases, Data Warehouse , BI reporting and Dashboard development.
- Should be able to understand customer requirements, define and plan project scope with resource requirements and timeline.
- Customer facing skills to represent Valiance well within the customer's environment and drive discussions with senior personnel regarding trade-offs, best practices, project management and risk mitigation.
- Should be able to propose and recommend technology architecture, choice of technology platforms based on different workloads, cost constraints and client requirements.
- Coach and mentor engineers to raise the technical ability of the rest of the team, and/or to become certified in required GCP technical certifications.
- Become a thought leader in data engineering for Valiance; representing the company in different technology events, support in pre-sales activities, build and grow data engineering practice.

Experience & Skillset Required

- Python, SQL, Airflow, NIFI, PySpark, Hadoop, Hive, HDFS
- Cloud Platforms: GCP, AWS.
- Certifications: CGP Professional Data Engineer
- Hands-on knowledge of GCP managed services e.g., Big query + Data proc + Dataflow + pub/sub + Looker+ Cloud composer + Data prep + Data fusion + Cloud SQL

Recruitment Process

There will be 3 rounds of selection:

- Interview 1 - Technical Discussion
- Interview 2 - Technical Discussion+Assignment round
- Interview 2 - HR

Let's Grow Together!
