Analytics

Job Description

- As a Tech Lead, you will be responsible for leading software and data engineering teams to deliver cutting-edge data products on the cloud for our customers.
- Work with business and functional stakeholders to understand data requirements and downstream analytics needs.
- Responsible for ratifying technology solutions, producing concise Design documents, including Source to Target mappings, data manipulation / processing logic, contribute to work estimates
- Create Design Documentation and approach for successful program delivery.
- Understand different project methodologies, project lifecycles, major phases, dependencies and milestones within a project, and the required documentation needs.
- Translate business requirements & E2E designs into technical implementations based on system capabilities.
- Implement Data integration and Data Warehouse based solutions using AWS features.
- Create solution for data and process migration from on-premises to AWS without business impact.
- Ensure consistency in approach, design, and output to deliver quality and concise design solution documentation.
- Define, promote re-usable, extendible, scalable, maintainable solutions considering trade-off for cost vs benefit
- Communicate at all levels in a clear and credible way about the importance of solution design.
- Lead developers in the team and foster a shared vision for design.

Experience & Skillset Required

- Prior exposure in successfully leading the development & delivery of data applications
- Exposure to Software Development Solutions and Design specification/documentation
- Experience in Python, SQL, Spark, EMR, Hive, AWS
- Good understanding of AWS platform for solution integration and optimization.
- Solution delivery for data processing components in larger End to End projects
- Stakeholder management including persons at working at higher grade
- Understanding data transformation, MI/BI reporting, Data Warehouse Concepts, Data Relational Models

Other skills

- Ability to think logically and articulate process designs
- Good attention to detail/hands on with excellent organizational skills
- Ability to collaborate across teams to deliver complex systems and components and manage stakeholder's expectations well
- Experienced with planning, estimating, organising, and working on multiple projects.

Let's Grow Together!
