VALIANCE

Job Description: Front End Developer (React + TypeScript + JavaScript)
Experience: 3–4 Years
Location: Noida

About the Company
We are a dynamic and innovative technology company leveraging cutting-edge cloud technologies and generative AI to create groundbreaking solutions that address complex challenges across various industries. Valiance is a global AI and Data Analytics firm dedicated to empowering organizations through innovative technology solutions for digital transformation. We collaborate with marquee brands across India, the US, and APAC, delivering transformative solutions in Credit Risk, Fraud Detection, Predictive Maintenance, Quality Inspection, Data Lake Development, IoT Analytics, and more. Our team consists of 100+ experts specializing in Machine Learning, Data Engineering, and Cloud Technologies

About the Role

We are looking for a skilled Front End Developer with strong expertise in React, TypeScript, and JavaScript to join our engineering team. The ideal candidate will be responsible for developing responsive, high-performance web applications and collaborating closely with design and backend teams to deliver seamless user experiences.

Key Responsibilities

- Develop and maintain scalable web applications using React, TypeScript, and JavaScript.
- Build reusable and modular UI components for consistent and efficient development.
- Translate UI/UX designs into high-quality, responsive, and user-friendly interfaces.
- Optimize applications for maximum speed, scalability, and performance.
- Integrate frontend components with backend APIs and services.
- Write clean, maintainable, and well-documented code following best practices.
- Debug and resolve application issues and improve existing functionalities.
- Collaborate with cross-functional teams including designers, product managers, and backend developers.
- Stay updated with emerging frontend technologies and industry trends.

Required Skills & Qualifications

- 3–4 years of hands-on experience in frontend development.
- Strong proficiency in React.js.
- Solid experience with TypeScript and modern JavaScript (ES6+).
- Good understanding of HTML5, CSS3, and responsive design principles.
- Experience with state management libraries (Redux, Context API, etc.).
- Familiarity with REST APIs and API integration.
- Experience with version control tools like Git.
- Understanding of frontend performance optimization techniques.
- Knowledge of testing frameworks is a plus
