About the Role:

We are looking for a skilled Full Stack Engineer with expertise in React, Python, SQL, and AWS to join our engineering team. The ideal candidate will have a strong background in building scalable web applications and cloud-based solutions. This role requires end-to-end development capabilities, from frontend UI implementation to backend APIs and database management.

Key Responsibilities:

- Design, develop, and maintain full-stack applications using React, Python, and SQL.
- Develop RESTful APIs and integrate third-party services.
- Build responsive and user-friendly web interfaces using React.js.
- Implement backend logic and business processes using Python (Django or Flask preferred).
- Design and optimize relational databases using SQL (PostgreSQL, MySQL, or similar).
- Deploy, manage, and scale applications on AWS (EC2, Lambda, S3, RDS, API Gateway, etc.).
- Ensure application security, performance, and maintainability.
- Work with DevOps teams for CI/CD, logging, and monitoring.
- Collaborate with designers, product managers, and other engineers to deliver high-quality software.
- Troubleshoot, debug, and optimize code for performance.

Requirements:

- 3+ years of experience in full-stack development.
- Strong proficiency in React.js for frontend development.
- Expertise in Python (Django/Flask/FastAPI) for backend development.
- Hands-on experience with SQL databases (PostgreSQL, MySQL, or similar).
- Experience with AWS cloud services such as EC2, Lambda, S3, RDS, API Gateway, and IAM.
- Knowledge of RESTful APIs, microservices architecture, and authentication mechanisms.
- Familiarity with version control tools (Git/GitHub/GitLab).
- Strong understanding of software development best practices, testing, and deployment.
- Experience with containerization (Docker, Kubernetes) is a plus.
- Strong problem-solving skills and ability to work in an agile environment.

Preferred Skills:

- Knowledge of GraphQL and WebSockets.
- Experience with NoSQL databases (MongoDB, DynamoDB).
- Exposure to serverless architecture and event-driven programming.

Understanding of CI/CD pipelines and infrastructure as code (Terraform, CloudFormation).
Strong communication and collaboration skills.
